Opportunity

Creating opportunities for growth

Zero

Effective risk management to drive Zero harm

Engaged

Connecting with our communities with an emphasis on sustainability and diversity

Respect

Behaving with integrity and treating others with respect

About Us

Centrals is an experienced, accredited regional general contractor based in Geraldton WA.

Having been in business since 1978 and being regionally based we have turned our hand to a wide range of projects to sustain our business for over 40 years.

Our projects include roads, mine site infrastructure, and mine site services, marine works, land development, crushing and screening services and site rehabilitation, .

The things that are incredibly important to us are straight forward. Simply that our people are safe and feel valued, that our clients are respected, that our suppliers feel part of the team and that we provide opportunity for first nation Australians and regional people regardless of gender, persuasion, or background.

Our Capabilities

Civil & Mining

Our Civil Capabilities

Centrals have a long history of delivering quality civil construction projects and have extensive capability and capacity to execute and deliver projects throughout Western Australia.

Centrals are prequalified with Main Roads WA to construct roads and bridges we execute works safely and to the highest standards.

Our projects have included rail cuts and embankments, marine projects, road projects, embankments and pavements, and land development works

Our Mining Capabilities

Centrals is a trusted partner providing critical site services and projects to our mining clients. Centrals provides bespoke services developed specifically for each site to ensure the consistent delivery of crucial services, providing clients with peace of mind, and allowing clients to focus on core business activities.

Centrals provide all aspects of civil services, ROM management and primary loading, plant site maintenance, mine set up including box cuts, roads and hardstands, tailings dam construction or lifts and ultimately mine site rehabilitation.
